

Bergari Solutions has developed a full line of exhaust emissions products for industrial engines to meet today's demanding emissions requirements.

Our products offer exhaust emissions reductions of NOx, CO, NMNEHC, PM and other hazardous air pollutants utilizing world-class catalytic components. We engineer standard and custom emissions reduction packages to precisely meet your targeted emissions requirements. In addition, we can integrate your specific exhaust noise reductions into the complete system package. We offer system designs ranging from 50 HP up to 5000 HP.

At Bergari Solutions, we design and manufacture high quality, robust products designed and built to meet the rigorous duty cycles and the harsh environmental challenges in these industrial applications.

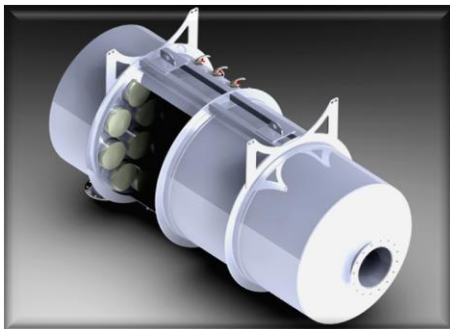

Trust Bergari Solutions to engineer and manufacture your specific emissions and noise reduction system.

- **OXIDATION CATALYSTS**
- **3-WAY CATALYTS**
- **DIESEL PARTICULAR FILTERS**
- **SELECTIVE CATALYST REDUCTION**

304 Stainless Steel DOC / 3-Way Housing

**ENGINEERED TO MEET CUSTOMER
DRIVEN REQUIREMENTS**

Integrated DPF / Silencer

Integrated DOC / Silencer

RICE/NESHAP DOC / Silencer

SCR Catalyst Housing

Combination DOC / Silencer / Spark Arrestor
